

# Remote Deposit Capture

## What is Remote Capture?

Remote Deposit Capture, in its most simple terms, is a service that allows a user to scan checks and transmit the scanned images and/or ACH-data to your bank for posting and clearing. Checks you receive at your business location can be scanned to create a "digital deposit." This digital deposit is then transmitted (over an encrypted internet connection) to our service provider who then accepts the deposit, posts the deposit to your account and your bank assigns availability based upon your funding schedule.

**"Deposit paper checks electronically without ever leaving your office. It is like bringing the teller window to your desktop!"**

## Key Benefits

The benefits of RDC can be substantial: convenience, reduced transportation risk & cost, better availability, processing efficiencies, the ability to consolidate banking relationships and more.

### Easy

- ▲ Simple set-up with existing computer and Internet connection
- ▲ Less than 30 minutes to learn the system

### Fast

- ▲ Scanners read up to 100 checks a minute
- ▲ Make deposits in just a few minutes a day

### Safe

- ▲ No driving to the bank with a bag of checks
- ▲ Secure internet transaction interface
- ▲ Ability to require supervisor approval

### Convenient

- ▲ View check images and reports online
- ▲ Multiple locations deposited into one bank - which is more cost effective
- ▲ Never have to leave your desk

## Saves Time/Money

- ▲ Deposits can be made as late as 8:00 pm Central, possibly later in the future
- ▲ No making photocopies of checks or filling out deposit slips
- ▲ Less time making deposits equates to much higher productivity with other tasks
- ▲ Faster fund availability - in many cases, funds are available the next day, improving cash flow
- ▲ Eliminate deposit errors with amount verification and correction service
