

Credit/Debit Card Processing Services

We help maximize your profit by minimizing your fees.

Unlike other payment providers, with Trilogy you won't find hidden or undisclosed fees. We offer far **more competitive rates** than other payment processors. Additionally, we work closely with our clients to determine the optimum transaction processing program in order to qualify for the best rates available for your business. We offer flexible connection methods such as wireless, IP, and dial-up. And with our **online reporting suite**, you always have the tools you need to manage your finances down to individual transactions.

Merchant Advance Funding

Need money for your business? Want an alternative to traditional bank financing?

We have a solution for you. Unlike traditional bank loans, merchant advance funding provides you with much needed capital **FAST** without the traditional hassle associated with collateralized loans. We provide you with the **funding you need NOW** and collect repayments from your processing deposits at a predetermined percentage (generally 15% of your daily deposit) until the advance and fees are repaid. You get your money fast, repayment is easy, and best of all, if you need a second advance, you are already approved! (Advances subject to underwriting.)

Gift Card Programs

Looking to enhance customer loyalty and improve brand recognition?

Gift cards are the answer. We can create a simple 30-card branded card program up to a full-color custom card program to **promote your business and grow your bottom line**. These easy-to-deploy cards are more than just for gift giving - offer them to potential customers or as a promotional gift 'with purchase.' Tracking is easy with web-based reporting and counterfeiting and fraud are virtually eliminated!

Check Guarantee and Conversion Services

Insufficient funds (NSF) is the number one risk for retailers who accept checks. Are you protected?

We can design a check acceptance program for your business to **protect against the risk of accepting 'bad' checks**. In addition to warranting checks, we will electronically convert your checks into ACH deposits, eliminating the need to go to the bank. Peace of mind and convenience - let Trilogy make check acceptance easier and safer for you!

ATM Machines

Customers need cash in hand?

Trilogy can equip your business with an ATM to provide your customers with the cash they need, while creating a profitable income stream for your business.

Remote Deposit Capture

It Is As Easy As 1,2,3!

Deposit paper checks electronically without ever leaving your office. It is like bringing the teller window to your desktop.

Remote Deposit Capture, in its most simple terms, is a service that allows your business to scan checks and transmit the scanned images and/or ACH-data to your bank creating a "digital deposit." This digital deposit is transmitted over an encrypted internet connection and posts to one or more of your bank accounts - availability is based upon your bank's funding schedule. For added convenience, you can even accept checks **over the phone** or by **fax!**

The benefits of RDC are substantial: it is easy, fast, safe, and convenient. RDC reduces transportation risk and cost, has better fund availability, creates processing efficiencies, and allows you to consolidate banking relationships. And the **recurring billing option** makes collecting multiple payments a breeze!
